

Machine Learning Based Early Warning System for Water-Borne Disease Prediction

Generated automatically by the training pipeline.

1. Dataset Overview

Total Records: 15000

Feature Count: 27

Low: 6000 (40.0%)

High: 4500 (30.0%)

Medium: 4500 (30.0%)

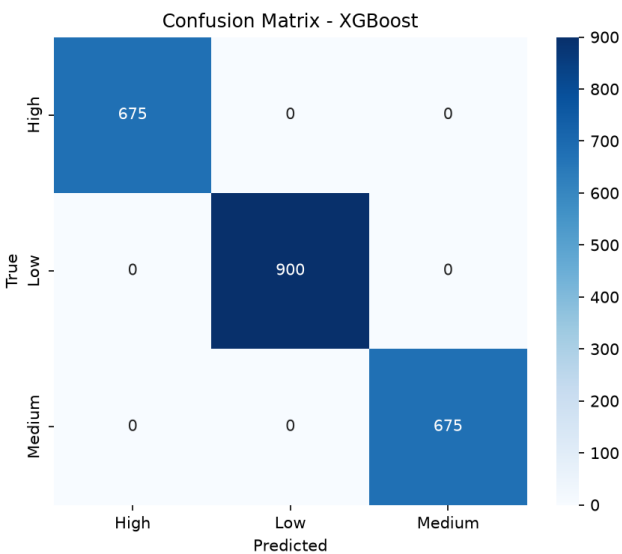

2. Model Accuracy

Model	Validation Accuracy	Test Accuracy
Random Forest	100.00%	100.00%
XGBoost	100.00%	100.00%

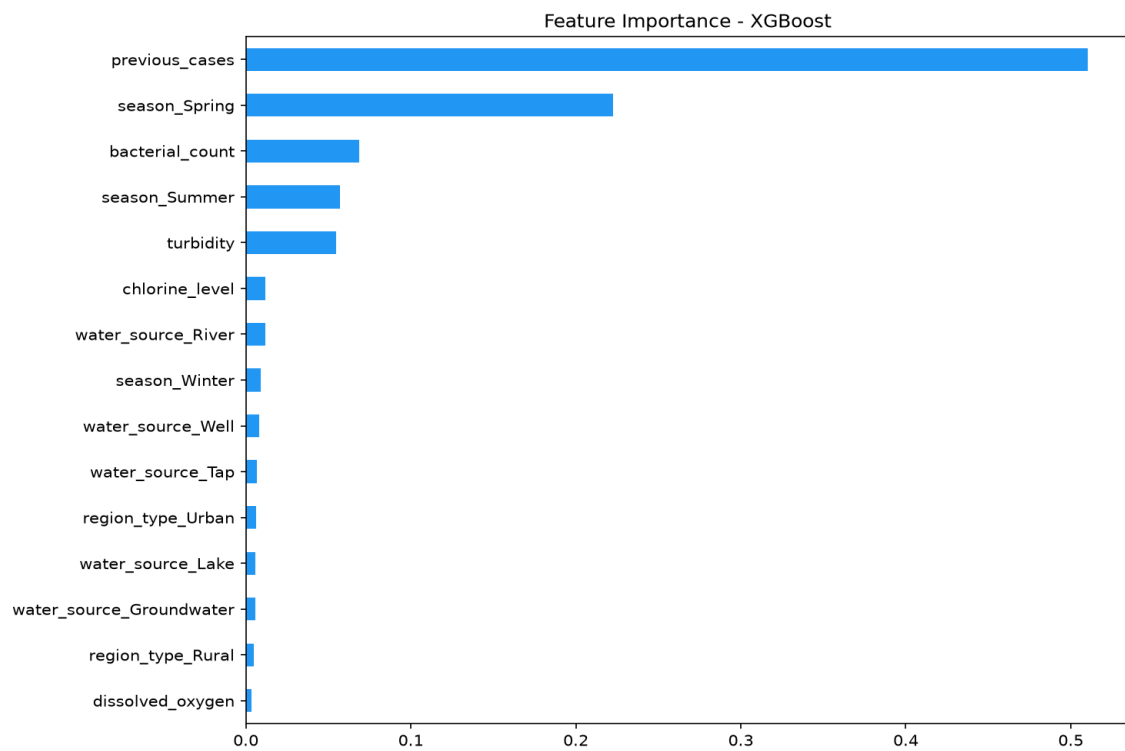

3. Classification Report (XGBoost)

Class	Precision	Recall	F1	Support
High	1.000	1.000	1.000	675
Low	1.000	1.000	1.000	900
Medium	1.000	1.000	1.000	675

4. Confusion Matrix

5. Feature Importance

6. Conclusion

The XGBoost model achieved 100.00% test accuracy and is used by the API for predictions.
